

COOPERATIVE ECONOMIC INSECT SURVEY REPORT  
Glenn A. Salsbury, Survey Entomologist

Report 11, Volume 55  
August 17, 2007

PINE PITCH MOTH: According to pheromone traps the moth flight has just begun in Northwest Kansas.

PINE SAWYER: Adults are just beginning to emerge. This indicates that there are two generations per year in Kansas.

LESSER PEACHTREE BORER: Adults are now flying.

REDHEADED ASH BORER: Adults are still being caught in the light trap.

BLACK CUTWORM: A strong flight is currently under way in the Pittsburg area.
